Overview | **Art17: Draft the delivery** | Edit properties | History

Art17: Draft the delivery

To deliver data select one of the following options:

- Add an empty report and start filling it online with webforms.
 - General
 - Habitat
 - Species
- Upload XML files generated from your local databases and (optionally) further edit them online with webforms. For information on the format see the [XML Format description](#) document.
 - Add Zip file
 - Add XML file
 - Add CIS file
- Upload additional files (optional).
 - Add other file

You can always interrupt your work and continue your contribution at a later date without losing data as long as the webform is saved during and after editing. **Deactivate Task**

Once you are satisfied that the Article 17 reporting has been completed and meets your national quality requirements, choose complete task and your delivery will be released to the public. After that, it will be quality assessed by the system. **Complete Task**

Files in this envelope:

General reporting format (0) | Habitat factsheets (1) | **Species factsheets (6)** | Other files (0)

Previous | Next | 1 - 6 of 6 species factsheets. Filter by species: [] Filter

	ID	Title	Last Update	Size	Operations
<input type="checkbox"/>	species-bombina-variegata.xml	Species questionnaire for <i>Bombina variegata</i>	14 Feb 2007	8.34 KB	Run QA #1
<input type="checkbox"/>	species-conopsea-kusceri.xml	Species questionnaire for <i>Conopsea kusceri</i>	08 Mar 2007	4.89 KB	Run QA #1

2. Biogeographical or marine level

2.1 Biogeographical region or marine region: Alpine

2.2 Published sources and/or websites: Slapanik, R. (2003): Strukovna izhodišča za vzpostavljanje omrežja Natura 2000. Mehkužci (Mollusca) (urgentno poročilo). Naročnik: MORS, Ljubljana. Biološki inštitut Jovana Hadžija ZRC SAZU, Ljubljana. 40 str.

2.3 Range of species in the biogeographical region or marine region

2.3.1 Surface range of the species in km2: 3400
 2.3.2 Date of range determination: 2006
 2.3.3 Quality of data concerning range: Moderate e.g. based on partial data with some extrapolation
 2.3.4 Range trend: Stable (=)
 2.3.5 Range trend magnitude (km2) - optional: 0
 2.3.6 Range trend period: 1952-2006
 2.3.7 Reasons for reported trend: Not applicable
 Other (specify): N/A

2.4 Population of the species in the biogeographical region or marine region

2.4.1 Population size estimation

Minimum population	Maximum population	Population units
34	000	Number of localities

2.4.2 Date of population estimation: 2006
 2.4.3 Method used for population estimation: Extrapolation from surveys of part of the population or from sampling
 2.4.4 Quality of population data: Moderate e.g. based on partial data with some extrapolation
 2.4.5 Population trend: Stable (=)
 2.4.6 Population trend magnitude: N/A
 2.4.7 Population trend period: 1952-2006
 2.4.8 Reasons for reported trend: Not applicable
 Other (specify): N/A
 2.4.9 Justification of % thresholds for trends (optional): N/A
 2.4.10 Main pressures: 853 - management of water levels
 140 Grazing
 141 - abandonment of pastoral systems
 2.4.11 Threats: 853 - management of water levels
 140 Grazing
 141 - abandonment of pastoral systems

2.5 Habitat for the species in the biogeographical region or marine region

2.5.1 Habitats for the species: N/A

IZKUŠNJE in TEŽAVE

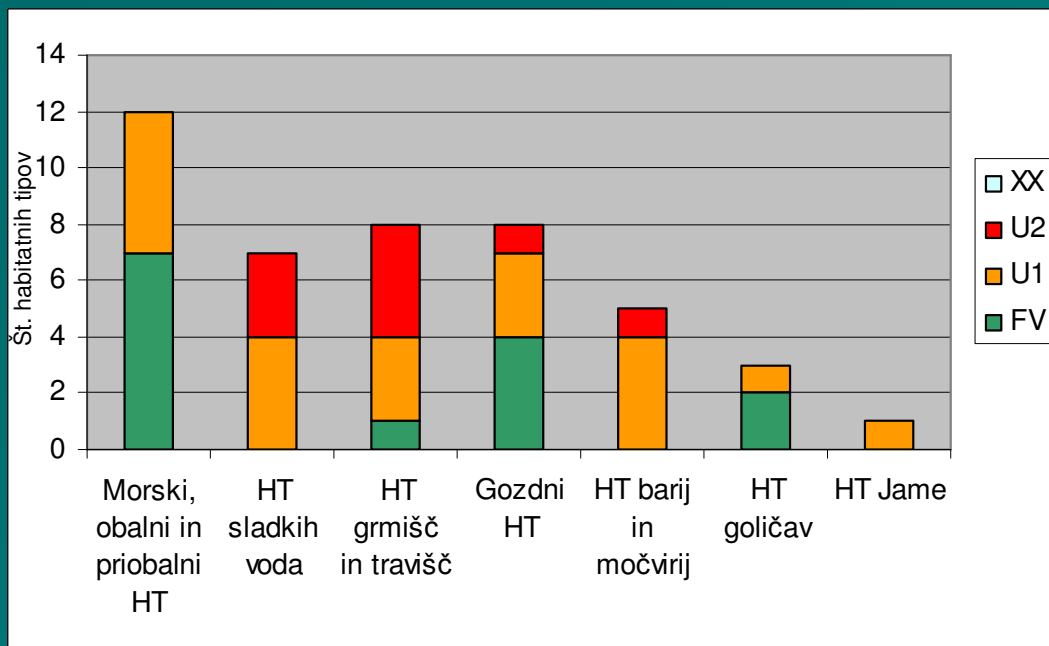

- Strokovni: praktični pristop
- Natančnost (merilo SLO in EU)
- Merilo velikosti populacije
- Površine habitatov vrst
- Trendi
- Kvaliteta podatkov
- Podatki izven Natura 2000 omrežja
- Sodelovanje
